

SKILLS

Python, JavaScript, React, Git, Redux, Flask, SQL, OOP, Express, Postgres, Docker, AWS, Google Maps, HTML, CSS, WordPress, SEO

PROJECTS

SoundHaze | *(React/Redux, JavaScript, Express, SQL, AWS)*

[live](#) | [github](#)

- Established user scopes in database models with Express to allow only intended information to be accessible when particular actions are performed.
- Integrated a JS player for the artist to interact and listen to selected material using a global redux store.
- Ensured artist authorization with the implementation of user authentication checking validation against backend set user authentication only allowing rendering the option to update/delete if it validates.

Postpix | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS)*

[live](#) | [github](#)

- Designed complex React components for astounding user design and interface, allowing dynamic content change on user interaction via comments/likes/following.
- Incorporated AWS for a complete experience allowing a user to upload an image from their local machine to be stored on the application database when creating a post.
- Implemented complex database tables and associations through Flask, using one-to-many and many-to-many polymorphic tables to friend other users while maintaining reduced time complexity.

Aktiv | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS, Google Maps)*

[live](#) | [github](#)

- Implemented list and dictionary comprehension using Python for ease of use on individual backend routes for easily accessible associated models/tables.
- Integrated Google Maps to mark a user's created route all while on creation it dynamically sets a user's distance and route using DirectionsServices and DirectionsRenderer.
- Constructed multiple unique instance methods on each route for optimized data manipulation for JSON information to utilize on the front end of the application.

EXPERIENCE

WordPress Developer / SEO Analyst / Data Entry - *CottageCare*

Feb 2023 - Present

- Organized WordPress site for SEO purposes to include strong keywords, and alt text for images for Google to help rank CottageCare greater than their competitors.
- Collaborated with the marketing team for Search Engine Optimization (SEO), using the RankMath plugin through the company's WordPress site, to improve site ranking increasing site traffic and creating a higher customer capture rate.
- Implemented several schemas via schema.org including location and services to help Google identify each page.

Assistant Service Manager / Service Advisor - *Larry H Miller Honda Downtown Spokane*

Sept 2019 - Dec 2022

- Delegated workflow in a high-paced environment with spur-of-the-moment deadlines and supplied working hours for a team of service technicians (approximately 25). Allowing me to develop strong leadership skills and remain calm in high-paced environments.
- Provided a consistently enjoyable customer and team experience by decreasing customer disconnect by bridging knowledge gaps to help customers understand vehicle needs and build trust.
- Oversaw most of the training and technical questions for the service drive ensuring a uniform business model.

Service Advisor / Technician - *Autonation*

Sept 2012 - Sep 2019

- Outpaced colleagues in the region (consisting of 14 stores) by honing in on technical skills gained as a technician. Along with using strong communication skills to transfer information from tech to customer.
- Worked as a group with co-workers (7 technicians, 3 service advisors, and the entire sales department) to reach store and regional goals. Using constructive criticism and feedback to improve listening and team skills.
- Diagnosed and repaired vehicles with particular issues as well as performed regular maintenance.

EDUCATION

App Academy

2021-2023

Rigorous 1000-hr full-stack web course that teaches OOP, SCRUM, TDD, REST, pair programming, security, and authentication. With a <3% acceptance rate.
