SKILLS

Python, JavaScript, React, Git, Redux, Flask, SQL, OOP, Express, Postgres, Docker, AWS, Google Maps React, HTML, CSS

PROJECTS

SoundCloud Clone | *(React/Redux, JavaScript, Express, SQL, AWS)*   **live** | **github**
- Built user scopes in database models with Express to allow only intended information to be accessible when particular actions are performed.
- Integrated a JS player for the artist to interact and listen to selected material using a global redux store.
- Ensured artist authorization with the implementation of user authentication checking validation against backend set user authentication only allowing rendering the option to update/delete if it validates.

Instapostpix | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS)*   **live** | **github**
- Designed complex React components for astounding user design and interface and allowing dynamic content change on user interaction via comments/likes/following.
- Incorporated AWS for a complete experience allowing a user to upload an image from their local machine to be stored on the application database when creating a post.
- Implemented complex database tables and association through Flask, using one-to-many as well as many-to-many polymorphic tables to friend other users while maintaining reduced time-complexity.

Aktiv | *(React/Redux, Python, JavaScript, SQLAlchemy, Flask, Docker, AWS, Google Maps)*   **live** | **github**
- Utilized list and dictionary comprehension using Python for ease of use on individual backend routes for easily accessible associated models/tables.
- Integrated Google Maps to mark a user's created route all while on creation it dynamically sets a user's distance and route using DirectionsServices and DirectionsRenderer.
- Constructed mulitple unique instance methods on each route for optimized data manipulation for jsonable information to utilize on the frontend of the application.

EXPERIENCE

Assistant Service Manager / Service Advisor - *Larry H Miller Honda DownTown Spokane*   Sept 2019 - Dec 2022
- Managed workflow in a high paced environment with spur of the moment deadlines and supplied working hours for a team of service technicians. Allowing me to develop strong leadership skills and remain calm in high paced environments.
- Provided a consistent enjoyable customer and team experience by decreasing customer disconnect by bridging knowledge gaps to help customers understand vehicle needs and build trust.
- Oversaw most of the training and technical questions for the service drive ensuring a uniform business model.
- Built lifelong customers through the ability to serve customer needs all while consistently performing as a top service advisor every month.

Service Advisor / Technician - *Autonation*   Sept 2012 - Sep 2019
- Outpaced fellow colleagues in the region by honing in on technical skills gained as a technician. Along with using strong communication skills to transfer information from tech to customer.
- Worked as a group with co-workers to reach store and regionally goals. Using constructive criticism and feedback to better listening and team skills.
- Diagnosed and repaired vehicles with particular issues as well as performed regular maintenance.

EDUCATION

AppAcademy   2021-2023
Rigorous 1000-hr full-stack web course that teaches OOP, SCRUM, TDD, REST, pair-programming, security, authentication. With <3% acceptance rate.
